

Rethink how you get there.

Introducing Boosted Rev.

BOOSTED REV

Finally, a vehicle-grade electric scooter

Our Mission

Boosted is on a mission to reinvent transportation to be fun, fast, and simple for everyone. Since introducing the category-defining Boosted board, we've been a pioneer in developing high-performance, vehicle-grade light electric vehicles for last-mile transportation. We're excited to introduce the latest member of the Boosted product family, Boosted Rev.

Boosted Rev is a true marriage of iconic design, vehicle-grade safety, and durability. We custom-designed and manufactured every component, incorporating our proprietary powertrain technology to deliver the unbeatable performance and quality our riders expect.

Quick

Boosted Rev delivers signature Boosted performance with its powerful dual-wheel drive and proprietary powertrain. It features a top speed of 24 mph and power that handles 25% grade hills with ease. Along with its instant acceleration and confidence-inspiring electric brakes, Boosted Rev allows you take on any commute. And with 22 miles of range, it's designed to get you there and back (and there again) on a single charge.

Easy

We've thought through every aspect of Boosted Rev, putting ease-of-use at the forefront of every design decision. The simple, intuitive Throttle Wheel allows for one-handed acceleration and braking with the roll of your thumb. Plus its LED display and custom-designed folding mechanism make the scooter a breeze to operate and tuck away when you're done.

- Price: \$1,599
- Range: 22 miles
- Top Speed: 24 mph
- Weight: 46.0 lbs
- Braking: Electronic and mechanical disc brake rear fender brake
- Hill Climbing: 25% grade
- Ride Modes: 3
- Charge Times: 3 hours
- Lights: Front headlight / rear brake light
- Display: Speed, battery level, ride mode

Safe

Boosted Rev is the only scooter on the market with truly powerful and effective electric brakes, giving you best-in-class power and responsive control so you can react to any situation. The distinctive frame geometry, ergonomic handlebars, and wide, custom-designed tires makes Boosted Rev remarkably stable so you feel confident and safe no matter what lies ahead.

Reliable

Boosted Rev is built with high-quality materials and advanced manufacturing techniques. We put our scooters through rigorous mechanical, electrical, and environmental tests that exceed industry standards. Next, we have our team of riders test them in real-life conditions. The result? A street-worthy, weatherproof scooter that we stand by with a 12-month warranty and industry-leading support.
