

HOW TO MAINTAIN YOUR BOOSTED BOARD THIS WINTER

BOOSTED EDITORIAL TEAM

HOW-TO

♡ 4

Winter is here. Check out these three tips to keep your board in shape while the weather cools down.

#1: Never store your board on low charge. Before putting baby in the corner, make sure it's charged all the way. If not, your battery could fully discharge and need servicing.

#2: Charge your battery every 6 weeks. Even phone batteries self-discharge. When you're not using your board, check in on it every 6 weeks to make sure your battery stays charged.

#3: Store your board indoors. Of course, you wouldn't leave your board in the rain or snow. But a freezing garage is bad for it, too. Keep your board dry inside.

And just like that, you're all set for spring.
